**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently Amended) A cartridge for use with a digital printing device, the cartridge including:
  - a first casing portion for housing print media; and,
  - a second casing portion for housing a supply of ink, the second casing portion being segregated into distinct chambers for storing a supply of different colored inks, each ink storage chamber having a corresponding ink outlet closed with a pierceable seal and is defined at least in part by a collapsible membrane; wherein  
each of the storage chambers is at least partially defined by respective collapsible membranes; such that  
each of the storage chambers have ink storage volumes that reduce with ink usage.
2. (Original) A cartridge device according to claim 1 wherein each ink outlet is in the form of a nozzle adapted to connect with a corresponding ink connection means provided on the printed device with which the cartridge is to be used.
3. (Cancelled)
4. (Original) A cartridge according to claim 1 wherein the casing includes a first print media storage molding, a second ink storage molding and an intermediate molding that serves to complete and enclose said print media and ink storage moldings, whilst simultaneously interconnecting the two.
5. (Original) A cartridge according to claim 1, the cartridge including a print media exit opening arranged in said first portion of the casing; and  
a transport assembly arranged at least partially within said first portion of the casing and being disposed upon operation to pick up and drive a sheet of said print media through said exit opening.
6. (Original) A cartridge according to claim 5 wherein said transport assembly includes:  
a drive shaft, pick up rollers rigidly connected with said drive shaft; and

4

a drive gear, said shaft and roller being captively supported within said first portion of the casing.

7. (Original)A cartridge according to claim 6 wherein the drive gear is adapted to engage a powered corresponding gear provided on the printing device with which the cartridge is to be used.

8. (Original)A cartridge according to claim 7 wherein the drive gear is able to engage a powered corresponding gear provided on the printing device by means of an aperture provided on said casing.

9. (Original)A cartridge according to claim 1 which includes a shielding means arranged in said first portion of the casing adjacent the exit opening for assisting in the supply of print media to said printing device.
